and **WHO** you work for?

JOIN US.

DevOps Administrator (m/f/d)

Business Keeper AG is the IT-company with a social claim. Our tools are helping to fight corporate crime such as corruption and money laundering. We stand for ethical and sustainable management. At present we are extending our applications.

Join an innovative, sustainably growing company located in the heart of Berlin. We are offering an independent working environment, diverse projects, fast decision-making processes, interesting benefits, flexible working hours and sabbaticals.

Support our international team, where continuous development and IT security are of consistently high importance.

Responsibilities

- Build-, release- and deployment-automation
- Support of continuous integration, deployment and delivery in agile environment
- Troubleshooting, error diagnosis, technical support and implementation of solutions
- Planning, configuration, service and continuous optimization of our internal development servers
- General DevOps coordination

Requirements

- Degree in IT or related technical training
- Work experience in DevOps is considered a plus
- Experienced in software-development with Java and in dealing with development-tools (Jenkins, Git, Maven, Artifactory, SonarQube, i.a.)
- Basic understanding of Linux server-systems is considered a plus

Business Keeper AG, headquartered in Berlin, is Europe's first and leading provider of an electronic whistleblowing system for preventing and combating white-collar crime. With its Business Keeper Monitoring System (BKMS® System), the company has been making an important contribution towards an economic culture based on values and integrity, for over 15 years. In addition to companies, public authorities and organizations of various sizes, Business Keeper AG also counts governmental anti-corruption institutions worldwide among its clients. The BKMS® System is currently used in 197 countries and regions, and about 60 languages.
