JOIN US.

Web Developer (m/f/d) / Frontend or Full Stack

Business Keeper AG is the IT-company with a social claim. Our tools are helping to fight corporate crime such as corruption and money laundering. We stand for ethical and sustainable management. At present we are extending our applications.

Join an innovative, sustainably growing company located in the heart of Berlin. We are offering an independent working environment, diverse projects, fast decision-making processes, interesting benefits, flexible working hours and sabbaticals.

Support our international team, where code quality, code reviews, test coverage and agile development are of consistently high importance.

Responsibilities

- Development and design of software products and APIs
- Planning and implementing of efficient frontend solutions
- Continuous system optimization with good development practices
- Come up with solutions to development challenges and present your ideas to the team
- Close cooperation with backend developers and product owner
- Ensure an optimal level of test coverage

Requirements

- Degree in IT or related technical training
- Work experience in Frontend Development
- Good practical experiences in ES6+, ReactJS, HTML 5, CSS 3, Webpack and REST APIs
- Knowledge of GIT and agile development
- Good sense for User-Experience and User-Interfaces
- Nice to have-skills:
 - TDD
 - Accessible web applications
 - Responsive design
 - CSS-Concepts, e.g. BEM
 - Java, Spring Framework

Business Keeper AG, headquartered in Berlin, is Europe's first and leading provider of an electronic whistleblowing system for preventing and combating white-collar crime. With its Business Keeper Monitoring System (BKMS® System), the company has been making an important contribution towards an economic culture based on values and integrity, for over 15 years. In addition to companies, public authorities and organizations of various sizes, Business Keeper AG also counts governmental anti-corruption institutions worldwide among its clients. The BKMS® System is currently used in 197 countries and regions, and about 60 languages.
