Do you care **WHAT** you do  
and **WHO** you work for?

JOIN US.

## QA Engineer / Test Automation Developer (m/f/d)

Business Keeper AG is the IT-company with a social claim. Our tools are helping to fight corporate crime such as corruption and money laundering. We stand for ethical and sustainable management. At present we are extending our applications.

Join an innovative, sustainably growing company located in the heart of Berlin. We are offering an independent working environment, diverse projects, fast decision-making processes, interesting benefits, flexible working hours and sabbaticals.

Support our international team, where code quality, code reviews, test coverage and agile development are of consistently high importance.

### Responsibilities

- Automation of test scenarios as well as analyses of the results
- Development of load and performance tests
- Development of test strategies
- Evaluation of test-frameworks and -tools
- Close cooperation in our testing team with developers and account-managers

### Requirements

- Degree in IT or related technical training
- First work experience in test automation for web applications
- Knowledge of Selenium, Java and JavaScript
- Structured working style and high quality awareness
- Nice-to-have:
  - Experience with Linux
  - Knowledge of software development processes

Business Keeper AG, headquartered in Berlin, is Europe's first and leading provider of an electronic whistleblowing system for preventing and combating white-collar crime. With its Business Keeper Monitoring System (BKMS® System), the company has been making an important contribution towards an economic culture based on values and integrity, for over 15 years. In addition to companies, public authorities and organizations of various sizes, Business Keeper AG also counts governmental anti-corruption institutions worldwide among its clients. The BKMS® System is currently used in 197 countries and regions, and about 60 languages.
